REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claim 3 is deemed allowable over the references Lee et al. (US 2002/0047560) and Komura (JP 2003-029271), since the combination fails to disclose or render obvious the distinct feature of "a plurality of projected micro-strips distributed on the top faces of each of the printing convex portions, wherein the height of the projected micro-strips is in the range of 2 to 55 μm , the width of the top face of the projected micro-strips is 3.5 μm or more, the space between the adjoining projected micro-strips is 7 μm or more, and the number of the projected micro-strips is in the range of 2 to 33 and is formed so as to be distributed in the width direction of the top face on the printing convex portion".

While Lee et al. disclose a layer forming relief comprising printing convex portions formed as linear strips and aligned to be parallel with each other with a pitch, Lee et al. fail to anticipate or render obvious the distinct feature of "a plurality of projected micro-strips distributed on the top faces of each of the printing convex portions, wherein the height of the projected micro-strips is in the range of 2 to 55 μm , the width of the top face of the projected micro-strips is 3.5 μm or more, the space between the adjoining projected micro-strips is 7 μm or more, and the number of the projected micro-strips is in the range of 2 to 33 and is formed so as to be distributed in the width direction of the top face on the printing convex portion".

While Komura teaches a layer forming relief having printing convex portions and a plurality of projected micro-strips distributed on the top faces of each of the printing convex portions, wherein the height of the projected micro-strips is in the range of 2 to 55 μm , the

width of the top face of the projected micro-stripes is 3.5 μm or more, the space between the adjoining projected micro-stripes is 7 μm or more, and the number of the projected micro-stripes is in the range of 2 to 33 and is formed so as to be distributed in the width direction of the top face on the printing convex portion, Lee et al. and Komura are not combinable. The reasons why they are not combinable are clearly pointed out in Applicant's arguments filed 6/16/2009 on pages 12-15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
